Computers...

“I remember the first time I was ever exposed to one. I used to think that the “monitor” was the brains of the computer. Little did I know that the monitor was just a window inside the machine! I have come a long way, and so can you! It is hard to make sense of it all, but we have a computer class coming up soon – come and learn the basics. I promise this class will be educational, fun, and very rewarding!”
